EDUCATION

Wayne State University

College of Engineering, BSc in Computer Science (GPA: 3.8)

Detroit, MI

May 2025

- Wayne State University Irvin D. Reid Honors College
- College of Engineering Dean's List | Wayne State Society of Engineers

Prominent Coursework | Organizations

Object Oriented Programming | Data Structures and Algorithms | Software Engineering | Algorithm Design and Analysis
Large Language Models | Computer Architecture | Linear Algebra | Amazon Web Services Cloud Computing Club

EXPERIENCE

EliteMedMatch | Detroit, Michigan | Lead Software Developer

November 2025 - Present

- Architected a **SaaS** mentorship platform connecting pre-med students and physicians through role-based workflows, **60+ REST APIs**, **Stripe** billing, automated mentor payout infrastructure, and **3** service tiers (\$499-\$3,799)
- Built the platform using **React**, **TypeScript**, **Express.js**, **PostgreSQL**, **Supabase**, and **Drizzle ORM**, designing scalable data models, authentication flows, and **API** architecture
- Engineered a real-time scheduling system using the **Google Calendar API** to validate mentor availability, prevent booking conflicts, and automatically generate **Google Meet** sessions upon successful booking
- Led technical architecture, database design, backend services, frontend implementation, deployment workflows, and third-party platform integrations across the product lifecycle

Intellinetics Inc | Columbus, Ohio | Full-Stack Software Engineer, Product

May 2025 - Present

- Designed and delivered an admin-configurable maintenance platform spanning **SQL Server**, **ASP.NET MVC**, **Razor**, and **PowerShell** automation, enabling controlled maintenance windows across production environments
- Implemented **40+ ASP.NET MVC** and **SQL Server**-backed **API** endpoints across **50+ feature requests**, enabling new invoice-processing workflows and administrative capabilities within a production enterprise platform
- Optimized backend performance through **SQL** query tightening, **C#** controller refactoring, and **MVC** response improvements, reducing latency across frequently accessed platform endpoints by **~30s**
- Established code-review practices across **C#**, **JavaScript**, and **SQL** codebases in **Azure DevOps**, improving consistency, maintainability, and deployment quality across the engineering team

Urban Science | Detroit, Michigan | Software Developer

January 2025 - April 2025

- Developed an **AI**-powered **KPI** analytics platform using **AngularJS**, **C# .NET**, and **SQL Server** that generated dealership-specific performance insights and recommended actions from business intelligence data
- Integrated **OpenAI** and **D-ID APIs** to generate personalized scripts, voice narration, and synthetic-avatar video explanations, reducing content production time/costs by **~70-80%** compared to video creation workflows
- Implemented secure authentication and authorization using **JWT (JSON Web Token)** and **BCrypt (password hashing)**, protecting application data and user access across the platform.

PROJECTS

CRM Pro | Detroit, Michigan | Software Developer

September 2024 - December 2024

- Developed a full-stack CRM platform using **Next.js**, **React**, **TypeScript**, and **Firebase**, enabling management of customer records, media assets, business expenses, and scheduling workflows through a unified web application.
- Developed automated test suites using **Jest** and implemented deployment workflows through **Vercel**, maintaining **90%** code coverage and reducing regression risk during release.

CarPiServer | Software / Hardware Development

September 2022 - December 2022

- Co-developed a lane-detection system for autonomous RC cars using **C++** and **Python**, integrating **Raspberry Pi**, **Arduino**, and **ESP** modules for real-time **image processing** and control, achieving **90%** detection accuracy

TECHNICAL SKILLS

- **Languages:** TypeScript, JavaScript, C/C++, C#, Python, Java, SQL, Swift, PowerShell
- **Frameworks:** React.js, Next.js, .NET, Angular, Tailwind, Node.js, Django, MongoDB, Firebase, Jest, XUnit
- **Tools:** Git, Visual Studio, VS Code, Azure DevOps, IntelliJ, Postman, SQL Profiler, Jira, Claude
